

# A service network providing speedy, high quality service support.

In addition to providing customers with superior products, Shibaura Mechatronics Group also gives full consideration to delivering essential inspection and maintenance services that allow customers to get the very best performance from those products.

Through enhanced cooperation between sales and service bases, both at home and abroad, and by putting in place support systems that allow us to quickly and comprehensively meet customer needs, we continue to promote efforts to improve our services and our quality.
